Black Mountain Sewer
Docket Control No. SW-02361A-08-0609

Dear Commissioners,

I support de-commissioning the Black Mountain Sewer Processing Plant located in the midst of a beautiful residential neighborhood within 100 feet of adjacent residences.

I recognize that there will be some costs to Black Mountain Sewer users involved in this de-commissioning and remediation effort, and I am willing to accept my share of these costs.

The problems my neighbors and I are experiencing prompting me to write this letter are identified below:

- Strong and nauseating odors, offensive to both Boulders residents and Boulders Resort guests, frequently coming from the Processing Plant
- Health concerns from chemicals required to be inserted trying to mitigate the odors
- Loud noises coming from the Processing Plant
- Frequent repair and pumper trucks driving through the residential neighborhoods of the Boulders, and parking in front of the Processing Plant
- Decreased home and property values because of the proximity of the Processing Plant to many homes within the Boulders, and the odors, noises and truck traffic associated with the Processing Plant
- It would be more efficient to de-commission the Processing Plant now, rather than continue to waste more funds each year in costly repairs and then de-commissioning the Processing Plant and remediating the land at a later date.

Thank you for your consideration of this request,

Subject: : Black Mountain Sewer Docket #SW02361A-08-0609

I have just sent this to the Commissioners! Hope it helps!! e

Dear Commissioners,

We are residents of the Boulders and have suffered with the sewer gas odor for the last ten years RIGHT AT OUR FRONT DOOR! Several neighbors have the same problem and we have been unable to find a solution. We have tried everything but to no avail!! When the air is still, the foul odor settles down to ground level and stays until a breeze comes up to blow it away. We have contacted the Black Mountain Sewer District on numerous occasions but they seem to be tired of listening to all the problems that our community has endured with the sewer installations in our neighborhood.

Now is the time to solve all the problems. We have to suffer the effects of the odor and the possible health issues involved with the chemicals treatment plant. Move the sewer plant and have the problems over. We understand that there may be a slight increase in our sewer fees.

Give us back the clean air that our tax dollars and our sewer fees pay for.

Al and Elisabeth Finch
